

PRESS RELEASE

Eastland County Launches Online Access to Court Case Images Through Secure Web Portal

Eastland, Texas – April 2026

Eastland County has announced the launch of online access to court case images through a secure, web-based portal powered by iDocket. This initiative provides attorneys, bail bondsmen, and the public with convenient access to court records while maintaining strict data protection standards.

County Clerk **Cathy Jentho** confirmed that redacted court case images from the County Courts of Eastland County are now available online. All documents accessible through the system are processed to ensure sensitive information, including social security numbers, is removed, safeguarding personal confidentiality.

The introduction of this service allows users to access court information 24 hours a day, 7 days a week, improving accessibility and transparency across the judicial system. By making records available online, the County Clerk's office expects a reduction in in-person visits and telephone inquiries, helping streamline operations and improve overall efficiency.

"Court information will be easily available and accessed 24 hours a day, 7 days a week," said County Clerk Cathy Jentho. "By making this service available, customer service will increase and personal traffic and telephone requests are being reduced, saving taxpayer dollars while still protecting personal information."

Eastland County joins a growing number of counties adopting digital solutions to enhance public access to court information while maintaining secure and reliable systems for judicial operations.
