

iDocket.com announces adjustment on surcharges 1/01/2017

Effective January 1st, 2017, an adjustment to surcharges will be implemented at the following rates:

Gold Plan: \$0.75 per search exceeding 200 searches per day

Silver Plan: \$1.15 per search exceeding 150 searches per day

Bronze Plan: \$1.50 per search exceeding 100 searches per day

To avoid surcharges, subscribers with heavy search usage should add Users to their account since the search total is at the Account level, not at the User level. By adding Users to the account, it increases the maximum number of searches included in your plan before surcharges apply.

Both the number of maximum number of searches and the charge for each additional search is dependent on the subscriber's plan. If there are multiple users on the same account, surcharges are applied to the group of users collectively. Example: Account with 3 Users on the Gold Plan has 600 (3x200) maximum searches before surcharges are applied.

Additional Users on the same account are offered at half price.

Surcharges were implemented into the iDocket web site to curb data mining of our case information. Since inception, surcharges have proven to economically curtail companies from programmatically searching and storing case results. Please email support@idocket.com to adjust your plan.

Thank you,

Armando Balderrama
